

Good morning,

After several searches:

I was able to locate HEC-2 data for Little Cross Creek in Cumberland County, NC. Data cover approximately cross sections 004 thru 161 (match 004-161 in 2007 FIS study) Data will be taken from the microfiche and could be hard to read in places. This data is not available digitally.

I was able to locate HEC-2 data for Cross Creek in Cumberland County, NC. Data cover approximately cross sections 020 thru 434 (match 020-434 in 2007 FIS study) There is a Letter of Map revision that cover cross sections 137 thru 151 you will receive the data associated with this also (Letter and model) I could not locate the remaining cross sections 439 thru 495. Data will be taken from the microfiche and due to the originals some places may be faded and hard to read. This data is not available digitally.

I was able to locate HEC-2 data for Cool Spring Branch in Cumberland County, NC. Data cover approximately cross sections 007 thru 051 (match 007-051 in 2007 FIS study) Data will be taken from the microfiche and due to the originals some places may be faded and hard to read. This data is not available digitally.

I was able to locate HEC-2 data for Eutaw Creek in Cumberland County, NC. Data cover approximately cross sections 004 thru 034 (match 004-034 in 2007 FIS study) Data will be taken from the microfiche and due to the originals some places may be faded and hard to read. This data is not available digitally

I was able to locate HEC-2 data for Country Club Branch in Cumberland County, NC. Data cover approximately cross sections 017 thru 042 (match 017-042 in 2007 FIS study) for Cross sections 068 and 070 check the Country Club Branch Left Fork. Data will be taken from the microfiche and due to the originals some places may be faded and hard to read. This data is not available digitally.

I was able to locate HEC-2 data for Country Club Branch Trib. A (Left Fork) in Cumberland County, NC. Data cover approximately cross sections 016 thru 021 (match 016-021 in 2007 FIS study) Data will be taken from the microfiche and due to the originals some places may be faded and hard to read. This data is not available digitally.

This is all the data available in our library location.

All of the data will be placed on the FTP site when the additional cost has been received and approved.

Thanks,

Alan Mejia
